

Ozark Biomedical Centrifuges

Conditions and Standard Warranties

Ozark Biomedical offers a wide array of centrifuges. Our prices vary based upon purchase condition, accessories, and warranty coverage discussed at the time of purchase. Many of our centrifuges are offered in conditions ranging from new, reconditioned, and Inspected/Service/ed/Tested. Our conditions and applicable warranties are as follows:

New Centrifuges: Our new centrifuges come directly from the OEM to you or your customer, complete with factory warranty. These warranties are defined by the manufacturer and are included with purchase.

Reconditioned Centrifuges: Our Reconditioned units provide significant savings to you without any sacrifice to quality and come with our standard 90-day warranty*. Additional warranty plans are available upon request and final purchase price will reflect increased warranty beyond 90 days.

Inspected/Service/ed/Tested Centrifuges: Ozark Biomedical provides I.S.T. units too. These centrifuges are good condition units that appear to have received regular maintenance and were not abused. We inspect and service these units, replacing any parts that show weakness or fatigue. They then undergo our stringent, quality control tests to ensure these units meet OEM specifications. These units are guaranteed against DOA and come with a 30-day warranty*.

* Warranty includes problem diagnosis, parts, and shipping for customer technical staff to install. On site service by dispatched technical staff will be billed at cost.
