

Ozark Biomedical is built around the needs of our customers. We offer new and rebuilt motors, latches, and PCB's for many of today's laboratory centrifuges. In many cases, you will save nearly 50% on parts versus buying from the OEM. All while still meeting strict quality demands of ISO 9001:2008. That is the savings you want while ensuring the quality you deserve.

Visit [www.ozarkbiomedical.com](http://www.ozarkbiomedical.com) for all your centrifuge parts & service needs.

Ozark Biomedical also offers quality New, Reconditioned, and Certified centrifuges at significant savings. All our centrifuges are backed by our industry-recognized support.

We offer new centrifuges from Clay Adams, Drucker, Hettich, Thermo Fisher, to name a few. These models are brand new, direct from OEM with warranty coverage.

Our reconditioned centrifuges are hand-picked, reliable units that are meticulously rebuilt from the chasis up. These units then undergo a stringent Quality Control process that meet or exceed OEM specifications.

Ozark Biomedical's line of recertified centrifuges are gently used units that have been inspected for wear, serviced, and tested to meet OEM standards. These units offer the highest degree of savings for end users. There is plenty of life left in these centrifuges.

Visit [www.centrifugestore.com](http://www.centrifugestore.com) to view our centrifuge lines available for purchase. Use the online contact form to let us assist you in finding a particular centrifuge.
